TO WHOM SO EVER IT MAY CONCERN

Subject: Flexible Water Connectors (Stainless Steel)

RWC / Cash Acme flexible stainless steel water connectors are designed for use in accessible locations to connect water heaters, fixtures and other water connected devices to the water supply. These are manufactured in compliance with ASME A112.18.6-2009 / CSA B125.6-2009 and listed by IAPMO.

The flexible water connectors are non-combustible and do not propagate combustion, hence there is no requirement for clearance to combustible material. The flexible water connectors should be installed in accordance with the requirements of latest plumbing and all applicable provincial / local installation codes.

Yours Sincerely,

A handwritten signature in black ink, appearing to read "P. Flynn", is set against a light green rectangular background.

Peter Flynn
